## ANALYSIS ON TOSS RELATED ACTIVITIES AND THEIR CONSEQUENCIES

### TOSS WINNERS

In [55]:

```
s.countplot(x = 'toss_winner', data= df)
mp.xlabel("Teams")
mp.ylabel("Number of times toss won")
mp.xticks(rotation = 'vertical')
mp.title("Toss Winners")
mp.show()
```

#### OBSERVATION:

-> Mumbai Indians have won the highest number of tosses which is 11

-> Kings XI Punjab have the least count on winning tosses which is 4

#### TOSS DECISIONS

In [56]:

```
s.countplot(x = 'toss_winner', hue = 'toss_decision', data = df)
mp.xlabel("Teams")
mp.ylabel("Toss Frequency")
mp.xticks(rotation = 'vertical')
mp.title("Toss Decision")
mp.show()
```

#### OBSERVATION:

> Rising Pune Supergiant, Kolkata Knight Riders, Kings XI Punjab have only chosen to

-> Rising Pune Supergiants, Kolkata Knight Riders, Kings XI Punjab have only chosen to field all the times

## TOSS RESULTS

-> In the given dataset we dont have a column on relating the match winner and toss winner

-> Creating a column with "YES" or "NO":

-> 'YES' if match winner and team winner is same

-> 'NO' if match winner and team winner are different

In [59]:

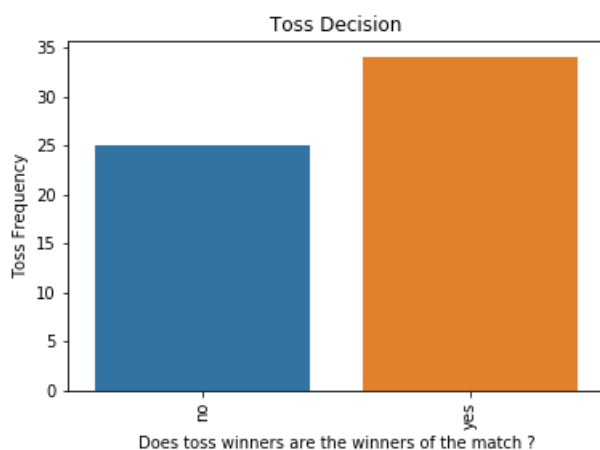

```
df['toss_win_match_win'] = np.where(df['toss_winner'] == df['winner'], 'yes', 'no')
df[2:6]
```

## OBSERVATION:

-> The toss winners have won 34 matches on total of 59 matches

-> The toss winners have lost 25 matches out of 59 matches

## TOSS RESULTS

EFFECT OF TOSS RESULT ON EACH TEAM

In [71]:

```

## OBSERVATION:

-> Mumbai Indians have the highest match wins when they won the toss

-> Royal Challengers Bangalore have lost the highest number of matches when they lose the toss

## ANALYSIS ON TARGETS

-> If a team chases then it will win by wickets

-> If a team defends then it will win by runs

## Creating a column TARGET:

-> CHASED if a team win\_by\_runs = 0 and win\_by\_wickets != 0

-> DEFENDED if a team win\_by\_runs != 0 and win\_by\_wickets = 0
